

## Introduction

The VIP is a streamlined approach to reduce emissions by replacing old, high-polluting vehicles with newer, lower-emission vehicles. This program is limited to owners/operators with fleets of 3 or fewer vehicles that have been operating at least 75% in California during the previous twenty-four (24) months. The goal of this program is to reduce emissions from in-use heavy-duty trucks in small fleets by replacing engine Model Years 2002 and older with Model Years 2007 (or newer) emissions compliant models. The VIP will be implemented by AQMD through contractual agreements with Dealers and Dismantlers. The Dealers will apply to the AQMD for the vouchers on behalf of the applicant. The approved voucher amount will be deducted from the total purchase price of the truck by the Dealer. Applicants interested in replacing their truck must purchase their replacement truck through an AQMD-approved VIP Participating Dealership (list provided inside) that has completed the required training for the VIP. Updates to this list and a new list of AQMD-approved

Retrofit Installers will be posted on our webpage as they become available.
